Centralized Security

Management

Remote Monitoring &

Adjustment

MetorNet 3 Pro is a Windows based remote security management system. It enables monitoring and adjustment of all parameters of the Metor family of walk-through metal detectors from a single PC.

COLLECTS STATISTICS

MetorNet 3 Pro collects statistics from the Metor walk-through metal detectors with passenger and alarm counters. These statistics can be summarized and printed in easy-to-read reports. In addition, collected statistical information can be stored in ACCESS format into a database for further processing. The user can select whether the database is stored on a PC or on a network drive.

SAVING THROUGH RESOURCE ALLOCATION

By collecting statistics through **MetorNet 3 Pro**, it is easy to allocate personnel to the right places at the right time.

CONTROL NETWORK FEATURE

The operator receives a written message whenever there is a deviation from the original settings stored in the PC. This quickly indicates any misuse or malfunction of the gate and increases the overall security level.

EASY CONNECTIVITY

Because **MetorNet 3 Pro** utilizes existing Ethernet cabling at the customer's premises, adding new Rapiscan Systems Metor metal detectors to the **MetorNet 3 Pro** network is very easy. The need for expensive cabling is minimized thus reducing costs.

ENHANCED USER INTERFACE

- All parameters of the topology can be controlled
- An image of each metal detector is shown
- Pop-up menus
- Built-in help system
- Colors can be configured on the topology

OVERALL SYSTEM MANAGEMENT

Up to 255 metal detectors can be connected to one network. The gates can be grouped and identified individually and/or by group name. The user can define the security level (set of parameters), which can be applied to an individual gate, to a group of gates, or to a whole network.

SUPERIOR SYSTEM SECURITY

MetorNet 3 Pro has two user levels: USER and SUPERUSER. The SUPERUSER has access to all parameters and can assign editable USER access rights. Each USER/SUPERUSER can have an individual password to prevent unauthorized access. The amount of USER/SUPERUSER accounts is unlimited. **MetorNet 3 Pro** also provides Log in and Log out data.

APPLICATIONS

MetorNet 3 Pro offers an easy way to manage one or several gates through a single PC in the following applications;

Airports

Prisons

Industry

Amusement Parks

Financial Institutions

Special Events

Distribution Centers

Government Buildings

ONE COMPANY - TOTAL SECURITY
